May 26, 2021

To the PPRTA Board of Directors and CAC members:

PPRTA First Quarter Progress Report 2021

Please find the following progress summary for January, February, & March 2021.

The Town of Green Mountain Falls continued to undertake all regular road maintenance practices including the filling of priority potholes on the Town's limited paved roads. With respect to the remainder of the municipal street system that remains unpaved, Town staff subjected all roads to routine grading, compaction, and drainage support operations. In addition, all such roads are treated bi-annually with a comprehensive application of magnesium chloride, both to mitigate dust impacts and preserve surface conditions.

Town Staff coordinated with PPRTA and Wilson & Company, Engineer, Andre Bracken, who began work on the Stilling Basins Project. The first phase of that project is now complete, which involved a stormwater drainage study. The second phase has been approved by the Board of Trustees, and Mr. Bracken and his team have started working on the construction documents.

With respect to the Town's first quarter maintenance allocation, Town staff worked and continues working to build up road base, grade, apply mag chloride, replace under road and in right-of-way culverts, compact its gravel roads as well as use the services of a third party to patch asphalt.

Respectfully submitted,

Angie Sprang, Town Manager
